

Fig. 1 is a schematic diagram of a control system. It features a battery connected in series with a motor (M) and a switch (30). The switch is controlled by a mechanical assembly. This assembly includes a vertical shaft (45) with a handle (47) and a lever (72). The lever is connected to a switch mechanism (70) which controls the motor. Other components labeled include 50, 53, 74, and 77.
